

AI for Human Benefit, Everywhere

JBS-04K

AI based Stroke Total Solution

MEDIHUB STROKE

JBS-04K

AI based Hemorrhagic Stroke Detection Solution

| Summary

Cerebral hemorrhage is a disease caused by an external shock, high blood pressure, and rupture of the cerebral blood vessels due to a cerebral aneurysm. And depending on the cause, area, and amount of bleeding, it is treated with medication or emergency surgery.

JBS-04K is a medical solution based on artificial intelligence, which detects cerebral hemorrhage from patient brain CT. This solution targets fast cerebral hemorrhage diagnosis in emergency situations and provides a lesion area and location for cerebral hemorrhage analysis.

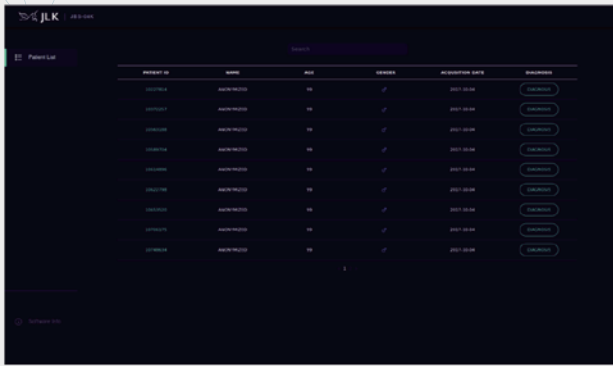

| Key Components & Performance

- Single Data Center AUC 98.35%
- Analysis Time within 10 seconds
- Convenient patient data management through PACS interworking
- Display analysis result within the web-based user interface

| Input / Output

- **Input Data** Patient's Brain CT DICOM
- **Output Information** Cerebral Hemorrhage Area, Cerebral Hemorrhage Probability

Solution UI

1 Analyzed Cerebral hemorrhage patients list UI

2 Cerebral Hemorrhage Analysis result UI

Unique Functionality

- Training four cerebral hemorrhage sub-type.(EDH, SDH, ICH, IVH)
- Provide fast analysis and result for emergency situations
- Provide by visualizing the detected cerebral hemorrhage area
